

CitySafe

**AI-Powered Cyberbullying Prevention, Evidence, and Legal Education
for Smart Cities**

Building the protection, compliance, and legal-awareness infrastructure
for digital communities.

STRATEGIC REPOSITIONING

From Demo to Governance Product

1

Technology Demo

Keyword-based offensive language detection

2

Human-in-the-Loop

Risk screening with context-aware AI

3

Governance Product

Scalable safety for schools, platforms, and public-sector partners

CitySafe is a governance-oriented digital safety product: supporting cyberbullying prevention, evidence preservation, moderation triage, and legal-awareness education.

WHY NOW

Cyberbullying Is a Governance Crisis

Platform Governance

Compliance obligations and brand risk are now directly tied to online safety.

Public Visibility

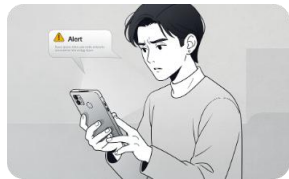

Cases like Quan Hongchan's online abuse triggered national debate and police action.

Growing Demand

Schools, communities, and platforms need tools to identify harm early and reduce escalation.

VALUE PROPOSITION

Who CitySafe Serves

Victims & Users

Self-check, risk alerts, evidence packaging, and easier reporting.

Content Posters

Pre-submission warning before harmful content escalates.

Moderators & Platforms

Priority review queue, better triage, lower manual workload.

Schools & Youth Orgs

Prevention, digital citizenship, and legal-awareness education.

B2B2G2C Growth Path

1

SaaS Layer

Schools, universities, youth communities, and small-to-mid platforms.

2

Smart-City Expansion

Community governance, online civility, and youth-protection programs.

3

API & Private Deployment

Licensing and enterprise deployment for larger platforms and institutions.

Revenue Streams

- Subscription SaaS
- API call licensing
- Private deployment
- Compliance modules
- Campus safety packages

Long-term moat: Policy alignment, explainable evidence packaging, human-in-the-loop design, and multimodal capability.

A Deployable, Realistic Foundation

Text + Context = Strongest Configuration

CitySafe's text-plus-context setting outperforms text-only baselines, proving that structured context materially improves moderation performance.

This is not a distant autonomous AI judge. It is a **lightweight, human-centered pipeline** — deployable today, expandable toward richer multimodal inputs over time.

Detection + Legal Awareness

Legal Boundary Reminders

When harmful content is detected, CitySafe reminds users that online insults, defamation, privacy invasion, and repeated abuse may carry legal consequences.

Evidence Guidance for Victims

Guides targeted users to preserve evidence and use appropriate reporting channels.

Digital Citizenship Education

For schools and youth users, CitySafe serves as an anti-bullying and responsible online engagement interface.

MAIN NARRATIVE

AI That Strengthens Human Judgment

See Harm Earlier

Helps users and moderators recognize risk before it escalates.

Respond Faster

Priority triage and automated workflows reduce response time.

Preserve Evidence Better

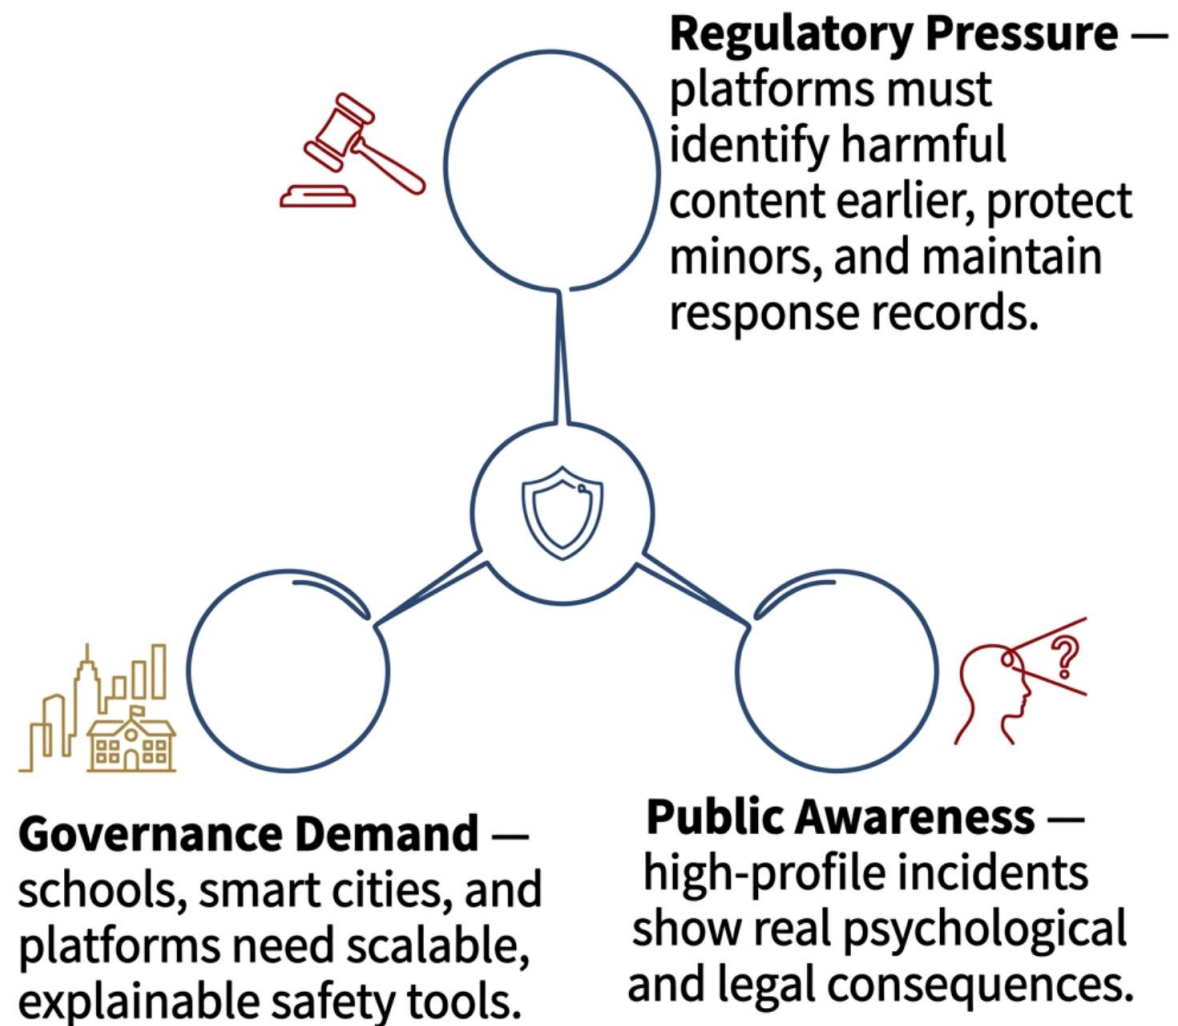

Structured evidence packaging supports reporting and legal protection.

Build Healthier Spaces

Combines compliance, education, and governance into one platform.

A Compliance Market, Not a Niche Issue

Why Investors Should Care

Anti-cyberbullying technology is not a niche emotional issue. It is part of a **larger governance and compliance market** — recurring, visible, and increasingly tied to brand risk and regulatory obligation.

"The market no longer asks whether cyberbullying governance matters. It asks which products can help organizations do it effectively and at scale."

CitySafe — Our Vision

Protection

A practical safety layer for schools, platforms, and smart-city ecosystems.

Compliance

Human-in-the-loop workflows that meet growing regulatory demands.

Education

Legal awareness and digital citizenship for the next generation online.

CitySafe is not just an AI model for detecting abuse. It is the protection, compliance, and education infrastructure for the future digital public sphere.
